REGENERATION OF PUBLIC HERITAGE

The public assets administered by the Agenzia del Demanio boasts 42 thousand properties, for a value of 61 billion euros. In synergy with the Institutions and Territorial Bodies, the Agency aims to contribute to the development of the country's economic and productive, social and cultural fabric, through a process of maximizing the value of assets, ensuring efficient management and correct use. In order to give back to the community otherwise abandoned areas, regenerating pieces of urban space forgotten by the phenomena of urban growth, it is necessary to promote and enhance the assets through regeneration operations, encouraging the redevelopment of underused or abandoned buildings, giving them a new meaning and a new use.

In this scenario, restoring a new identity to places means not only working for the safety of the buildings themselves and for the environment, designing in an energy-efficient, environmentally sustainable and seismically safe way, but also including a social awareness for a new cultural and community balance.
